

**2010 Eden Road "Gundagai"
Shiraz**

WHO: Eden Road
WHAT: Shiraz
WHERE: New South Wales, Australia
WHEN: 2010

There are lots of flavors there, but they are not in pleasing blends and smoothly transitioning layers. Instead, they are all there duking it out in the glass, each vying with the other for your attention. Violets linger on the finish. Tannins are still aggressive, doing their own separate dance. The wood, fruit, and other flavors, along with tannins and acids, need at least five years to settle down and knit together.
